OBJECTIVE

To excel in the field of Computer Science, applying my technical, analytical, interpersonal and communication skills to contribute innovative solutions and drive success in technology-driven environment

PROJECTS

Expense Tracker – Full Stack Personal Finance Management System

A full-stack web application designed to help users manage and analyze their personal expenses efficiently with secure authentication, expense categorization, and interactive spending insights. The system enables users to register and log in securely, add, update, delete, and filter expenses, and visualize spending patterns through charts and summaries for better financial decision-making.

- Developed using React.js with a responsive Tailwind CSS user interface

- Uses Node.js and Express.js backend with MongoDB Atlas database via Mongoose ORM, implementing RESTful APIs and JWT-based authentication for secure client-server communication

Tech Stack:React.js, Tailwind CSS, Node.js, Express.js, MongoDB Atlas, Mongoose, JWT, RESTful APIs

Hybrid Post-Quantum Cryptography (PQC) Enabled VPN-Quantum-Resistant Secure Communication System

A client–server VPN system implementing Kyber512-based Post-Quantum Cryptography to enable quantum-resistant secure communication and evaluate network performance metrics.

- Implemented quantum-safe key exchange using the Kyber512 algorithm via the Open Quantum Safe liboqs library.

- Integrated WireGuard VPN with PQC-derived shared secrets and used Tailscale mesh networking for secure client–server connectivity.

- Evaluated system performance using ping, iperf3, and system monitoring tools to measure latency, throughput, CPU usage, and tunnel stability.

Tech Stack: Ubuntu Linux, WireGuard VPN, Tailscale, Open Quantum Safe (liboqs), Kyber512, Networking Tools (ping, iperf3), Bash/Linux Utilities

EDUCATION

NMAM Institute of Technology, Nitte

B.Tech in Computer Science and Engineering (Cyber Security) - 8.82/10

2023 - Present

EXPERT PU College, Mangalore

Pre-University (Class XII), Science-PCMS - 86.66%

2021 - 2023

SKILLS AND INTERESTS

Technical Skills: Java, Python, C, HTML, CSS, GitHub, MongoDB, Express.js, React.js, Node.js

Soft skills: Adaptability, Critical Thinking, Problem Solving, Teamwork, Leadership

Interests: Software Development, Cyber Security, Machine Learning

PUBLICATIONS AND CERTIFICATES

Design and Implementation of a Hybrid Post-Quantum Cryptography (PQC) Enabled VPN for Quantum-Resistant Secure Communication

Published in: [2026 5th International Conference on Innovative Practices in Technology and Management \(ICIPTM\)](#)

NPTEL Certification – Internet Crimes and Cyber Security

Completed NPTEL's Internet Crimes and Cyber Security course, gaining expertise in cyber threats, digital forensics, cyber laws, and information security practices.
